

Semiconductor Supply-Chain Alert - 2026-09-25 15:33 UTC

Scanned global disaster feeds and news: **108** events with supply-chain relevance, **5** touching semiconductor manufacturing or shipping. Top 3 below.

1. **[WARNING]** Shipping chokepoint disruption - Iran proposes seven - day roadmap to reopen Strait of Hormuz

Source: GDELT news (2026-09-25 09:45 UTC) - <https://www.siasat.com/iran-proposes-seven-day-roadmap-to-reopen-st...>

Relevance to semis: 0.56 / 1 | Severity: major | Region: middle_east

Historical precedents (semiconductor index vs S&P 500 after the event)

Event	Date	+1 day	+5 days	+20 days	Supply shocks	Demand shocks
Ever Given blocks Suez Canal	2021-03-23	-1.9%	-1.5%	-3.5%	- The incident exposed a need to investigate issues of supply chain resilience and disruption to just-in-time manufacturing already facing shortages from COVID-19 pandemic impacts. - The event delayed goods, which impacted industries with existing shortages, such as with semiconductors, thereby influencing markets already at risk of collapsing.	- SCA head Osama Rabie demanded a billion-dollar compensation for lost revenue and the cost of the salvage operation, and warned that legal battles could prevent the departure of the ship. - Despite the blockage, overall revenue for the first six months of 2021 was up by 8.8% to US\$3 billion when compared with the same period the previous year.
Red Sea attacks - carriers pause Suez route	2023-12-15	+0.5%	-0.1%	-0.8%	- On 12 January 2024, Tesla said it would suspend most production from its Grünheide factory, its only factory in Europe, for two weeks starting 29 January due to supply chain issues caused by Houthi attacks. - A considerable number of freighters have continued to transit, with mostly large container ships diverting away rather than other shipping, with the strait continuing to be heavily used by bulk carriers and tankers which are...	The annual revenue of the Suez Canal meanwhile declined to \$7.2 billion for the 2023–24 financial year, down from about \$9.4 billion the previous year.
Shanghai COVID lockdown	2022-03-28	-0.1%	-4.6%	-8.3%	- The outbreak caused substantial economic and social disruption across Shanghai with consequences felt elsewhere, and led to the spread of COVID-19 to other parts of China, including Beijing, Guangdong, and Hunan. - Doctor Zhang Wenhong of the Shanghai Medical Treatment Expert Group, said the control of COVID-19 in Shanghai is like "catching a mouse in the ceramic shop", and said maintaining a normal manufacturing industry and public life...	None found in source
Russia invades Ukraine	2022-02-24	+2.2%	+0.4%	-2.9%	- The supply of neon, needed for chip manufacture and lasers, was also severely constrained by the conflict. - Ukraine produces about 70% of the global neon supply, and 90% of the semiconductor-grade neon used in the United States.	- Sales to the Middle East and Asia helped make up for declining exports to Europe, and due to the higher price, Moscow revenues were \$20 billion monthly compared to \$14.6 billion a year before (2021). - High growth in the military economy results in the macroeconomic indicators biased towards the defense orders, so the collapse of civilian production by 10% was not reflected in the GDP.

Supply/demand evidence pulled live from Wikipedia and sorted by keyword rules:

Current sector reaction (vs S&P 500, as of 2026-09-25)

	Event window (up to 20 trading days)	Last 5 days	Last day
PHLX Semiconductor Index	+1.0%	+5.1%	+1.0%
TSMC	-0.3%	+2.8%	-0.3%
Micron	-0.3%	+5.4%	-0.3%
ASML	+0.8%	+2.7%	+0.8%
Intel	-3.1%	+13.1%	-3.1%
ZIM container shipping	-0.8%	-3.9%	-0.8%

Outlook (confidence: high)

Similar past events moved semiconductor stocks **-4.9%** vs the S&P 500 over 20 trading days (range -12.5% to -1.2%), adjusted for this event's severity. The sector has moved less than half of what similar events produced - a reaction may still be ahead.

How we scored this

- 11 articles from 11 distinct outlets in the last 72h (arabherald.com, asiaone.com, eurasiareview.com, euronews.com, middle-east-online.com...).
- Classified as 'shipping_chokepoint' in region 'middle_east' by keyword rules; mentions shipping lanes, ports or chokepoints.
- Analogs picked by event type and region similarity; expected move = similarity-weighted average of each analog's 20-day index reaction, scaled by severity ratio (current / analog, capped 0.33-1.5).

2. [WARNING] Geopolitical / military tension - Senate again rejects resolution to halt Iran war as rising fuel prices upend midterms

Source: GDELT news (2026-09-25 09:30 UTC) - <https://www.texarkanagazette.com/news/2026/sep/25/senate-again-reje...>

Current sector reaction (vs S&P 500, as of 2026-09-25)

	Event window (up to 20 trading days)	Last 5 days	Last day
PHLX Semiconductor Index	+1.0%	+5.1%	+1.0%
TSMC	-0.3%	+2.8%	-0.3%
Micron	-0.3%	+5.4%	-0.3%
ASML	+0.8%	+2.7%	+0.8%
Intel	-3.1%	+13.1%	-3.1%
ZIM container shipping	-0.8%	-3.9%	-0.8%

Outlook (confidence: high)

Similar past events moved semiconductor stocks **-4.0%** vs the S&P 500 over 20 trading days (range -7.5% to -0.8%), adjusted for this event's severity. The sector has moved less than half of what similar events produced - a reaction may still be ahead.

How we scored this

- 5 articles from 5 distinct outlets in the last 72h (aa.com.tr, aol.co.uk, dailykos.com, theguardian.com, ynetnews.com).
 - Classified as 'conflict' in region 'europe' by keyword rules; no chip/shipping mention, but a conflict in a chip- or shipping-critical region.
 - Analogs picked by event type and region similarity; expected move = similarity-weighted average of each analog's 20-day index reaction, scaled by severity ratio (current / analog, capped 0.33-1.5).
-

Caveats: Automated early-warning signal, not investment or underwriting advice. Historical reactions include unrelated market moves and a small sample; news-based events may be unconfirmed. Verify with primary sources (links above) before acting.
